11. (Twice Amended) A network system for facilitating the negotiation and purchase of goods or services for buyers and sellers, the system comprising:

a host processor system;

at least one buyer computer terminal including a display, operated by buyer of goods or services;

at least one primary seller computer terminal including a display, operated by a

primary seller of goods or services for selling the goods or services of the primary seller;

a virtual seller computer terminal including a display, operated by a virtual seller of goods or services who is not the primary seller for selling the goods or services of the primary seller, said virtual seller including a database storing product information concerning the goods or services of the primary seller;

a first real time two-way communication connection for selectively connecting said buyer computer terminal to said primary seller computer terminal or said virtual computer seller through said host processor system, said first communication connection for transmitting transaction data concerning the purchase of goods or services of said primary seller, input by a buyer into said buyer computer terminal, in real time to said seller computer terminal or to said virtual seller computer terminal for display to said seller and for transmitting transaction data, input by a seller into said seller computer terminal or said virtual seller computer terminal, in real time to said buyer computer terminal for display to the buyer;

said host processor system including processing means for selectively connecting a buyer computer terminal to either a primary seller computer terminal or a virtual seller computer based upon predetermined criteria, and

a sale agreement means for enabling a buyer to reach an agreement concerning the purchase of goods or services from a seller over the network system.

12. (Original) A network system for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 11 wherein said predetermined criteria includes a determination of whether the primary seller has ceased sales operations.

13. (Original) A network system for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 12 wherein said primary seller operates and ceases sales operations during predetermined periods of the day and said host processor processing means connects a buyer computer terminal to a virtual seller computer based upon a determination that said primary seller has ceased sales operations for the day.

14. (Original) A network system for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 11 wherein said predetermined criteria includes a determination of whether a primary seller is located within a predetermined distance of the buyer.

15. (Original) A network system for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 11 wherein said predetermined criteria includes a determination of whether a primary seller is located within a predetermined distance of the buyer and a determination of whether the primary seller has goods or services sought to be purchased by the buyer.

16. (Original) The network system for facilitating the negotiation and purchase of goods and services for buyers and seller of Claim 11 wherein the goods or services include vehicles.

17. (Original) The network system for facilitating the negotiation and purchase of goods and services for buyers and seller of Claim 15 wherein the goods or services include vehicles.

18. (Original) A network system for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 11 further comprising:

a second communication connection for connecting a buyer operating said buyer computer terminal and a primary seller operating said primary seller computer terminal or virtual seller operating said virtual seller computer terminal, said second communication connection permitting real time speech communication between buyers and sellers for facilitating the real time spoken negotiations for the purchase and sale of goods or services over the network system.

19. (Original) A network system for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 12 further comprising:

a second communication connection for connecting a buyer operating said buyer computer terminal and a primary seller operating said primary seller computer terminal or virtual seller operating said virtual seller computer terminal, said second communication connection permitting real time speech communication between buyers and sellers for facilitating the real time spoken negotiations for the purchase and sale of goods or services over the network system.

20. (Original) The network system for facilitating the negotiation and purchase of goods and services for buyers and seller of Claim 18 wherein the goods or services include vehicles.

27. (Cancelled)

28. (Twice Amended) A method of facilitating the negotiation and purchase of goods or services for buyers and sellers comprising the steps of:

providing a host processor system interconnected with at least one primary seller of goods or services, at least one virtual seller who is not the primary seller including a database storing product information concerning the goods or services of the primary seller; and a plurality of buyers of goods or services;

transmitting buyer identification information by a buyer to the host processor system;

selecting the virtual seller or a primary seller by the host processor system based upon predetermined criteria;

providing a real time two-way data connection between the buyer and the selected primary seller or virtual seller for transmitting transaction data from the buyer in real time for visual display of the purchase data to the seller and for transmitting transaction data from the seller in real time for visual display of the purchase data to the buyer, and

agreeing over the network system to the purchase of goods or services from a primary seller or virtual.

29. (Original) The method for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 28 further comprising the step of:

determining whether the primary seller has ceased sales operations; and

selecting the virtual seller or a primary seller by the host processor system is based upon the determination of whether the primary seller has ceased sales operations.

30. (Original) The method for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 29 wherein said primary seller operates and ceases sales operations during predetermined periods of the day.

31. (Original) The method for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 28 further comprising the step of:

determining the location of the buyer; and

the step of selecting the virtual seller or a primary seller by the host processor system is based upon the determination of the location of the buyer.

32. (Original) The method for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 28 further comprising the steps of:

determining the location of the buyer; and

determining what goods or services are sought to be purchased by the buyer;

and

the step of selecting the virtual seller or a primary seller by the host processor system is based upon the determination of the location of the buyer and the determination of what goods or services are sought to be purchased by the buyer.

33. (Original) The method for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 28 further comprising the step of:

providing a second communication connection between a buyer and a primary seller or virtual seller, the second communication connection permitting real time speech communication between the buyers and sellers for facilitating the real time spoken negotiations for the purchase and sale of goods or services over the network system.

34. (Original) The method for facilitating the negotiation and purchase of goods or services for buyers and sellers of Claim 32 further comprising the step of:

providing a second communication connection between a buyer and a primary seller or virtual seller, the second communication connection permitting real time speech communication between the buyers and sellers for facilitating the real time spoken negotiations for the purchase and sale of goods or services over the network system.

35. (Original) The network system for facilitating the negotiation and purchase of goods and services for buyers and seller of Claim 28 wherein the goods or services include vehicles.

36. (Original) The network system for facilitating the negotiation and purchase of goods and services for buyers and seller of Claim 33 wherein the goods or services include vehicles.
